

CH 3:25 - BUS LOAD

If

First 4 Sped buses will line up on the curb . 1st SPED bus will stop at the end of curbing, leaving the crosswalk open. The later small buses will go up the middle between the parked cars. Big buses can line up on the curb single file until all of the curb side SPED buses are in place. Once all SPED curb side buses are in place then the big buses can move up and double park with their doors positioned with the gap between the buses so students will pass from the curb straight to the bus door.
